

# PROJECT Visibility 4.0

Real time supply chain visibility for high-tech EU manufacturing

## Tradecloud One

### Supply chain platform

Any European manufacturer or wholesaler can connect to the Tradecloud One platform via the IDS connector or REST API and can exchange order and shipment data with each other in a structured and secure way.

## Features

- Automated shipment data communication
- Real time insights into shipped orders
- Centralized 'in context' communication
- Sharing order- and shipment data in a structured way

## Service/Application validation

Pilot done with one original equipment manufacturer and three suppliers in high tech metal manufacturing

## Benefits

- Less disruptions in manufacturing
- More visibility of data in the high-tech manufacturing supply chain
- Leverage the existing SCSN standard and IDS connectors to add more functionality.

| Order line  | Supplier sales order number | Item  | Dimensions                                  | Quantity |
|-------------|-----------------------------|---|---|----------|
| 2225792 - 1 | 0002617731 - 1              | 355.C.2 / -000<br>RVS 304 3000x1500x2 / 2500-0010-0152M | Length 3 m<br>Width 1.5 m<br>Height 0.002 m | 1 pce    |

## Acknowledgment

This work has been performed in the context of the **Sub-project Visibility 4.0** project, an open call #2 winner of the H2020 MARKET4.0 project (market40.eu), with participation of

This dissemination material is part of the Visibility 4.0 Project, an open call #2 winner of the MARKET4.0 Project that has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N° 822064.

The H2020 MARKET4.0 project develops an open multi-sided digital platform for enabling production equipment and service providers to connect and work together with manufacturing companies. The MARKET4.0 platform enables new business, based on value-adding interactions among the production equipment and service providers and their customers while at the same time provides an open and participative infrastructure for these interaction
